

Assignment 3 Report

Features:

We designed this website with the following features in mind:

1. For instructor user:
 - a. Register and login as an instructor.
 - b. To be able to view all of the students' grades for the course that they teach, as well as change and add grades if need be.
 - c. To be able to view all of the feedback given by the student.
 - d. To be able to view the regrade requests from students.
2. For student user:
 - a. Register and login as a student.
 - b. To be able to view all of their grades for a given course.
 - c. To be able to submit feedback to an instructor.
 - d. To be able to submit regrade request for each mark that they have received.

Task Division:

Qishen Chen: Handles the backend, implemented all of the functions in app.py, created the necessary database assignment3.db. Assisted greatly in debugging as well as works on partial parts of JQueryes and Jinja elements. (50%)

Rosa Mystica Luna Bertha: Handles the frontend, works mostly with HTML, CSS files, created the layout for the website, partially works on the connection between frontend and backend. Wrote the Jinja elements for some HTML files. (50%)
